QUICK START / CUSTOMERS

Find local. Make it yours.

A short guide to discovering independent restaurants, shops, and services.

1

Explore businesses

Open the homepage. Search by name or keyword, or use Business Type, State, City, and Category. Select Apply Filters. Browse States provides another way to start.

2

Open a business profile

Review the business information, photos, hours, and available links. Features vary by business. If no results appear, clear or broaden your filters.

3

Create your personal table

Use My Local Table to create a customer account or sign in. Save businesses using the save control on their profile. Your saved list appears in My Local Table.

4

Choose your style

Open Edit My Style. Add your display name, location, favorite color, teams, or causes. Select Save My Style, then return to My Local Table.

5

Explore community resources

Visit Community for Weather, Public Safety, Sports, and other local information. Use Resources to explore the business calculators and profit planner.

QUICK START / BUSINESS OWNERS

Bring your business to the table.

Basic listings are free. Submitted businesses are reviewed before becoming public.

1 Submit your business

Choose List Your Business Free or Add Your Business. Sign in as an owner and enter the requested information, hours, photo, business story, and ownership declaration. Submit once and look for the success message.

2 Understand the two reviews

Ownership-claim approval controls access to owner tools. Business-listing approval controls public visibility. A listing may remain pending while an approved owner edits its details.

3 Open Owner Dashboard

Sign in with the account used for the ownership claim. Select Manage Business to review and update your saved details. If the business is missing, confirm the account and ownership-claim status.

4 Review memberships

Open Membership and select your business. Featured is $99/year; Premium is $199/year. Review the current plan details and checkout terms before subscribing. Membership does not determine search placement.

5 Use your available tools

Analytics and other owner tools depend on your membership. Eligible ordering businesses must also complete payment setup. The dashboard shows the controls available to that business.

HELP / BILLING / SHARING

A few things to know.

Keep your account details handy and review billing before making changes.

Billing and membership changes

Select the correct business on Membership. Use Manage Billing when available. If billing verification fails, refresh and contact Local Table USA before changing plans. Do not repeat checkout to resolve an existing billing problem.

Founding member offer

The site advertises a second year free for eligible first-time paid businesses through December 31, 2026. Eligibility is checked during checkout. Review the offer terms; regular annual billing resumes in year three.

Different sign-in, different dashboard

Use the same account that owns the profile or business you want to manage. A browser may fill saved credentials automatically. Review the email before signing in, especially when switching between owner and customer accounts.

Need help?

Email gohardlogicticsllc@outlook.com with the page, business name, and a brief description. Never send passwords, card numbers, or secret API keys.
